

FOR IMMEDIATE RELEASE:

Chicago Public Schools Renews Partnership with SchoolNet

February 11, 2008 (New York, NY) - SchoolNet Inc., the nation's leader in Data-Driven Decision-Making for school districts, announced today that the Chicago Public School System has renewed its partnership with SchoolNet for three more years. SchoolNet's Instructional Management Solution (IMS), named the Curriculum and Instruction Management system (CIM) at Chicago, delivers student data, assessment, and curriculum management to over 25,000 teachers and administrators in the district's 655 schools.

"We are proud to extend our partnership with the Chicago Public School Systems," said Jonathan D. Harber, SchoolNet CEO and President. "Chicago has been an innovator in the adoption of instructional technology for years. The implementation of a robust system at the scale of over 400,000 students makes Chicago Public Schools perhaps the nation's leader in Instructional Management Solutions."

"Successfully deploying large scale IT projects requires talented staff and a strong partnership with your technology vendors," said Robert Runcie, Chief Information Officer of Chicago Public Schools. "We are lucky to have a comprehensive leadership vision to become the best urban school district in the country, a high quality internal team, and a strong partnership with SchoolNet."

Chicago Public School's renewal of its partnership with SchoolNet reflects its continued commitment to investing in student achievement. "As a district, we have pushed past access to data and now focus on helping schools triangulate data by digging into multiple sources, to individualize instruction for each student, identify a "learner-centered problem, and implement data team training facilitated by highly skilled eLearning data coaches, to provide a process that has specific, manageable steps to help educators build confidence and skill in using data as well as digital content from publishers in SchoolNet's Instructional Management System to design and implement instructional improvements at the classroom level."

Every day students, parents, teachers, and administrators use SchoolNet to access important data, enabling district-wide collaborative decision making. SchoolNet's customers educate more than two million students in over 50 cities. SchoolNet's Instructional Management System helps districts manage reporting, curriculum deployment, benchmark assessment, professional development, district wide communication and outreach to parents.

About SchoolNet, Inc.

SchoolNet Inc. is the leader in Data-Driven Decision Making for K12 school districts. SchoolNet's award-winning Instructional Management Solution (IMS) helps districts improve efficiency and increase student achievement. SchoolNet's systems are built upon an open, scalable platform that provides users

with the data, reports, tools, and content to develop teachers, individualize instruction, engage parents, and promote school improvement. SchoolNet's solutions are used successfully by many of the nation's largest school districts including Atlanta Public Schools, Chicago Public Schools, School District of Philadelphia, and Albuquerque Public Schools. SchoolNet is recognized by Inc. Magazine's Top 500 List and Deloitte's Fast 50 and as one of the fastest growing private companies in the country. SchoolNet was founded in 1998 by MIT graduate Jonathan D. Harber and education author Denis P. Doyle.
